OPENING GENERAL SESSION:

Carlton "Ray" Davenport
Commissioner, Virginia Department of Labor and Industry

FATAL FLAWS: AN OVERVIEW OF VIRGINIA'S WORKPLACE FATALITIES

Nearly 5,000 workers die each year as a result of fatal injuries incurred during work-related incidents. These preventable deaths devastate families and workplaces. Over half of all workplace fatalities in Virginia occurred in general industry in 2017. Construction companies totaled a quarter of all fatalities in 2017. In 2017, 11 of the 42 fatalities occurred in the construction industry. The agricultural industry, including tree trimming operations, typically accounts for five percent or fewer of all the workplace fatalities in Virginia. Males consistently make up the majority of workplace victims.

Join C. Ray Davenport, Commissioner of the Virginia Department of Labor and Industry as he addresses this issue and urges Virginia employers to carefully review injury and illness prevention programs and their work place safety and health procedures with their employees to reduce this tragic trend.

CLOSING GENERAL SESSION:

Michael Britt & Donny Hawkins
Sentinel Security Group, LLC

ADVANCED BASICS OF EMPLOYEE RESPONSE TO AN ACTIVE SHOOTER

As mass and active shootings continue to increase across the United States, individuals must be physically and mentally prepared to react to a progressive active shooter event. With this drastic increase it's no longer a question of "if" it's a question of "where and when". Active shooter events evolve quickly and generally range from 5-15 minutes. In most cases, these events are over prior to the arrival of the initial law enforcement response even with immediate dispatching. However, in numerous documented cases; active shooters have been stopped by citizens that are prepared to intervene and stop the threat. Properly trained individuals can identify, react, and respond in an active shooter situation to exploit the weaknesses of the shooter.... these are everyday people!

Join Sentinel Security Group as they discuss how to identify the appropriate actions in response to an active shooting event. Incorporating case based discussion along with inter-active demonstrations to highlight key points for the response of an active shooter event in the work place. Learn all about the importance of having a plan, training the plan, and exercising the plan during this presentation.
