

SOLAR INDUSTRY SAFETY

This session focuses on safety concerns surrounding the construction of photovoltaic systems. Participants will also receive an introduction to the principles of solar energy as well as basic industry terminology.

The Virginia solar industry is following a national trend of record-breaking growth. People working in all segments of the economy have become inundated with requests to consider the cost-saving benefits of solar. This course will provide an overview of how photovoltaic systems work, as well as and their unique hazards. We will also look at its different applications, from the residential to the utility scale, and how each may affect worker safety.

Presenter: WILLIAM REICHERT, CSP, CHST, SUNTRIBE SOLAR
